<https://twitter.com/ybonnel>

Profile

Full Stack developer

12 years experience on Java development

4 years on Postgresql

3 years on modern Javascript (like React.js)

2 years on elastic search.

Skills

Java

I work with java for 12 years, I like very much community around Java, go to JUG, Devovx, ...

Elasticsearch

I discover Elasticsearch 2 years ago, and i like the possibility of this product.

Postgresql

I develop with postgresql as primary storage for 4 years, i like the stability and all the features of this database.

Continuous delivery

I like to automate everything and have a real continuous delivery.

Javascript

I work with modern Javascript for 3 years with a specific framework inspired by React.js.

Infrastructure

For 4 years, I operate a complex system with 60 servers, and 2 000 req/s.

Technical

Java	Postgresql	HTML5	Jenkins
JEE	Play framework	CSS	Sonar
Kotlin	Vertx	React.js	Gradle
Spring	Android	Javascript/JQuery	Maven

Experience

Smart RX - Groupe CEGEDIM SAAS Architect

08/2014 - now

Transversal technical leader on all SAAS application

In charge of all SAAS application for pharmacies (more than 6000 clients)

Functions :

- Proof of concept
- Knowledge share
- Support on complex problem
- Code review
- CTO help on enterprise strategy
- Technological survey

Technologies :

- Java
- Javascript/EcmaScript 2016
- Play Framework
- Postgresql
- MemCached
- Git
- Elasticsearch (20 servers cluster)
- Debian
- Jenkins
- Sonar
- Upsource
- Infrastructure of 70 servers.

Expert developer on the client framework (from 04/2013 to 08/2014).

Functions :

- Support for all developers using the framework.
- Development of new features in framework.

Technologies :

- Java
- Maven
- SOA
- SVN

Transversal technical leader on 1 Java applications, team of 5 people (from 07/2013 to 03/2014).

Applications in charge of housing demand in France.

Functions :

- Technical expert: support for all developers.

Technologies :

- Java
- Maven
- Spring
- Struts
- Axis
- Postgresql
- Tomcat
- SVN

Transversal technical leader on 4 Java applications, team of 30 people (from 05/2012 to 06/2013).

Applications in charge of network activation for a french mobile operator.

New application management contract with reversibility.

Work in team with Indian people.

Functions :

- Continuous delivery: define build and install processes with Jenkins for all applications.
- Technical expert: support for all developers.
- Help to resolve issues on multiple environments.
- Realization of a Web portal for developers (Play framework).

Technologies :

- Java
- Ant
- Jboss
- Oracle
- Unix
- Jenkins
- Play Framework
- SVN

Technical leader on 2 Java applications, team of 100 to 200 people (02/2008 - 04-2012).

Redesign project of the core system for a french mobile operator.

This project covers from order to billing through a catalog for the offers' referential.

Functions :

- Bench of Cameleon Software (used for the catalog offers) - 5 months
 - Use of Load Runner.
 - Development of a webservice layer to abstract Cameleon (Jboss WS).
- Writing fonctionnal specifications for the catalog offers - 6 months.
- Technical leader on the catalog offers, 5 to 10 developers - 1 year
 - Webservices (JbossWS),
 - Hibernate,
 - Continuous integration (Maven, Hudson, Sonar).
- Technical leader on a taking order system, 10 to 30 developers - more than 2 years
 - Webservices (CXF),
 - Spring core, JPA, Hibernate,
 - Continuous integration (Maven, Jenkins, Sonar),
 - Installation and integration of Gerrit (software to help in code revue),
 - Realization of a Web portal for developers (Play Framework).

Technologies :

- Java,
- Spring core,
- Jboss,
- Hibernate, JPA,
- Webservices (JbossWS and CXF),
- Oracle,
- Unix,
- Maven,
- Jenkins,
- Play Framework,
- SVN,
- Git (used for Web portal).

Sopra Group
Junior Software Architect

11/2007 - 01/2008

Create an UI to manage documents (team of 5 people).

Application in charge of document management for all exploitation documents.

Functions :

- Participation in the pre-study for realization.
- Creation of the base code for the development.

Technologies :

- Java/JEE,
- Struts,
- Hibernate,
- SVN.

Sopra Group
Developer

07/2006 - 10/2007

Participation in every steps of an Application Management Contract (team of 4 to 10 people).

Applications used for a mobile operator to know the list of network antennas which would be used by users.

Functions :

- C++ developments under Unix for an activation system.
- JEE developments for an administration interface.
- Java developments under Windows for a forecasting system radio coverage.
- Participation in specifications and testing for these applications.

Technologies :

- C++,
- Unix/Shell,
- Java/JEE,
- Struts,
- PVCS Version Manager,
- VBScript.

Sopra Group
Developer

02/2006 - 06/2006

Final-year internship

Participation in developing an activation system for a french mobile operator.

- C++ developments under Unix (HP UX),
 - Unix Scripting (KSH).
-

Part in organisation of multiple conferences.

simplifiedom-component

12/2016 - now

<https://simplifiedomjs.github.io/simplifiedom-component/>

Just an other javascript component framework!

SimpleWeb4j

2013 - 2014

<https://github.com/ybonnel/SimpleWeb4j>

Small java framework to create web application based on angularjs and REST services.

YboTv

12/2012 - now

<https://github.com/ybonnel/ybo-tv-android>

<https://play.google.com/store/apps/details?id=fr.ybo.ybotv.android>

Android applications for France TV Program.

Some statistics :

- Downloads : more than 82 000,
- Comments : more than 650 ratings with 3.96/5 average.

"Transports Rennes" and "Transports Bordeaux"

08/2010 - now

<https://github.com/ybonnel/TransportsRennes>

<https://play.google.com/store/apps/details?id=fr.ybo.transportsrennes>

<https://play.google.com/store/apps/details?id=fr.ybo.transportsbordeaux>

Android applications for public transportation of Rennes and Bordeaux.

Use of Open-Data for these two cities.

Some statistics :

- Transports Rennes' downloads : more than 83 000,
- Transports Rennes' comments : more than 2000 ratings with 4.50/5 average,
- Transports Bordeaux' downloads : more than 96 000,
- Transports Bordeaux' comments : more than 1600 ratings with 4.49/5 average,
- Source code : more than 30 000 LOC (<http://www.ohloh.net/p/TransportsRennes>).

CsvEngine

2011 - 2013

<https://github.com/ybonnel/CsvEngine>

Small java framework based on annotations used to parse and write CSV files.

Transports Rouen

07/2012

<https://github.com/ybonnel/TransportsRouen>

<http://transports-rouen.appspot.com/>

Small mobile web app for public bikes in Rouen.

Used to test JQuery Mobile technology.
